Vehicle Description

This is a 1987 Olds 98 Regency Brougham. We have bought 2 new cars and have no reason to keep 3, so we are offering this to you. Here is what we are going off the top of our head what this needs. It has a power steering leak in the line in/around the drivers side front bumper that makes this hard to steer. This also needs a muffler/pipes so it makes it loud. That is all we can think of mechanically wrong with it. This has power mirrors which do not work, we had to put a new mirror on because we ran into the mailbox in the icy weather and has a small dent because of it in the drivers door, nothing major. We put used tires on the front and we drove it only 5 months after inspection and we always thought we would drive it again, but it is sitting in the neighbors driveway. The battery is good, we put it in 2 years ago but haven't drove it for 7 months of that 2 years. The headliner is droopy and we tacked it up so it wasn't hanging. This had a new motor put in it about 30,000 miles ago. This is a descent car and we drove it mostly highway miles to and from work. It has been a reliable car when we were using it. We have started the car once a week since it has been sitting. The air conditioner needs charged. There is no smoke coming from the tailpipe, it does not leak antifreeze or oil. There is no knocking or ticking for the motor. The tranny does not slip one bit. I can say that when you start it up it revs high until put into gear and then if you put it in park again it revs down. There was a new windshield professionally done about 15 months ago. This was our means of transportation for 2 years, but we wanted a truck and my wife wanted a new car, so that is what we did. The mileage is 172,2889

Features:

trunk release

gas release

power seats

power locks

tilt steering

leather seats

3.8L engine

automatic transmission

cruise (never woked since we had it, never checked into it)

front and rear arm rest
